Certification for TOUA

Demonstration of Compliance with Applicable Service Quality Standards and Consumer Protection Rules:

In establishing this certification in its *2005 ETC Order*,¹ the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”² The Commission found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement” and that the sufficiency of other commitments would be considered on a case-by-case basis.³ In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”⁴

Tohono O’Odham Utility Authority (“TOUA” or the “Company”) hereby certifies that it is complying with applicable service quality standards and consumer protection rules. As a tribally owned company, TOUA operates under the service quality standards and customer protections that are established by its Board of Directors, which is comprised of tribal members and utility business professionals. The Board receives monthly reports on outages, held orders and complaints. The topics are discussed as appropriate for each report.

¹ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) (“*2005 ETC Order*”).

² *Id.* at para. 28.

³ *Id.* The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: “(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection of consumer privacy.” *Id.* at n. 71.

⁴ *Id.* at n. 72.

Although TOUA is not under the jurisdiction of any state commission, the Company has developed a Local Exchange Tariff which contains consumer protection standards which are similar to those required by state commissions for the telecommunications carriers that are under state jurisdiction. Other obligations include, but are not limited to, truth-in-billing requirements; and CPNI, Red Flag Rules and other applicable federal requirements governing the protection of customers' privacy.

The Company is subject to consumer protection obligations for broadband services under federal law. These obligations include, but are not limited to, the following: public disclosure of accurate information regarding network management practices, performance, and commercial terms of broadband internet access services; as a means of providing sufficient information for consumers to make informed choices regarding use of such services, and for content, application, service and device providers to develop, market, and maintain internet offerings as specified in F.C.C. 47 C.F.R. Part 8 §8.3.

Certification for TOUA

Demonstration of Ability to Function in Emergency Situations

Tohono O'Odham Utility Authority ("TOUA" or "Company") hereby certifies that it is able to function in emergency situations as set forth in §54.201(a)(2).¹ The Company's voice and broadband network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Company can change call routing translations as needed to reroute traffic around damaged facilities. Changing call routing translations will also allow the Company to manage traffic spikes throughout its network, as emergency situations require.

Specifically, each central office building is supplied with standby generators that enable the central office to keep running until power is restored so long as fuel is available, or until system changes are made to reroute traffic. TOUA's local network consists of three exchanges and a fiber optic and microwave backbone to Tucson, Arizona where it connects with Qwest. TOUA has a limited ability to reroute traffic around damaged facilities and has a restoration plan in place to restore any disruption in service expeditiously.

¹ Section 54.201(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."
